PROFESSIONAL SUMMARY

Information Technology graduate from Ngee Ann Polytechnic with 1 year of automation and enterprise IT experience at OCBC Bank. Experienced in Python-based automation, Selenium monitoring, database integration, and workflow optimization. Proven ability to reduce manual processing time by 90%, lead technical initiatives, and deliver production-ready systems. Skilled in system engineering, enterprise scripting, and full-stack development.

EDUCATION

Diploma in Information Technology
Ngee Ann Polytechnic
Graduated: 2024

Degree in Computer Science
SIT
Present

TECHNICAL SKILLS

Programming & Frameworks: Python, JavaScript, C#, SQL, HTML, CSS, MVP, Scrum methodology
Automation & Tools: Selenium, UiPath, Git, Docker, Power BI, Excel VBA, Google Apps Script, Visual Studio, VS Code
Cloud & Databases: AWS, Azure, MongoDB, SQL databases
Systems & Networking: Windows/Linux, basic networking, enterprise automation & scripting
Machine Learning & AI: Clustering (K-means, Hierarchical), Text Analysis, Prediction Models

SAP (HR systems exposure)

PROFESSIONAL EXPERIENCE

Automation Intern

OCBC Bank | 1 Year

Key Projects & Contributions:

- **File Storage Maintenance Automation:** Python + RegEx script deleting log files >90 days; reduced manual processing time by 90%.
- **Online Banking Monitoring Automation:** Selenium-based system checking service availability before 5AM; automated email reporting of node health status.
- **CIF Query Automation:** Tested query speeds and generated automated email reports.
- **SSL Certificate Automation:** Automated SSL certificate renewal.
- **Database Exporter Tool:** Structured database extraction and integration with Confluence.
- Independently led multiple automation initiatives with recognition from directors and cross-department teams.

PROJECT EXPERIENCE

Polytechnic Projects

Year 1 Sem 1

- **Building Placement Game:** Developed scoring engine calculating points based on building placement logic.

Year 1 Sem 2

- **Movie Ticketing System (C#)**
- **Anime Gacha Game Website**
- **Cruise SQL Database Management**

Year 2 Sem 1

- **Clustering & Text Analysis:** K-means, hierarchical clustering, and association rule mining to analyze story/document data.
- **UiPath Workflow:** Automated extraction of P/E and other stock metrics for business reporting.
- **CRM Web System:** Fashion website with 4 admin roles for Sales, Customer, Marketing, Product Management.

Year 2 Sem 2

- **Verified Aid Resource Website:** Forum + feedback form for aiding less fortunate individuals; A grade project.

- **HR Analytics:** ML model predicting promotions using KPIs and training metrics.
- **Airbnb Price Prediction:** Location-based price prediction using ML.
- **Various SQL / MongoDB projects:** Credit cards, flights, and ADB datasets.

Year 3 Sem 2

- **Food Donation Website:** Web platform coordinating donations with ML prediction for demand.

National Service (NS) Projects

2024-2025

Worked with SAP-based HR systems for personnel data management and operational processes.

- **HR Dashboard Automation:** Excel macro integrating raw nominal roll & personnel data; filtered eligibility based on PES status, IPPT validity, and shooting criteria.
- **Chatbot Project:** Automated conversational bot for unit FAQs.
- **Google Calendar Auto Scheduler:** Database + Apps Script loop for scheduling automation.

2025-2026

- **Telegram Parade State Bot:** Automated attendance reporting.

Personal & Freelance Projects

2023-2024

- **Computer Vision Object Recognition:** Model detecting objects held.

2025

- **IB Broker Trading Bot (Live Capital):** Trading automation with IB API, Telegram updates.

2025-2026

- **Bicycle GMT Schedule Auto-Updater:** Cascading schedule recalculation.
- **Auto Car Depreciation Calculator**
- **Telegram-Based Inventory Ordering System:** Google Sheets backend management.

- **Capex/Opex Business Calculation Tools**
- **Library Overdue Email Automation:** 600+ automated emails, saving ~20 hours.
- **Law Case Time-Balancing Payroll System**
- **Teacher Workload Matrix Multiplier:** Workload allocation tool with varying subject/level weightage.

LEADERSHIP & ACHIEVEMENTS

- Team Lead: Polytechnic projects, OCBC internship, NS initiatives.
- Student Leader (Pre-Poly)
- Awarded **Outstanding CFC Rank, BSM Coin** & **BSOM Nominee** for leading tech initiatives.
- Director-level recognition at OCBC for automation contributions.
- Experience in customer service: Airforce marketing, hospitality/family business.

CERTIFICATIONS

- IBM Certifications, Scrum, UiPath, Workato
- NLP, Machine Learning, AI & Neural Networks, Data Fluency
